Discontinuous Projection

1. Use Reference track(s) and/or features to create a "projection"

Original
0   8   16   24   32   40   48   56   64   72

Reference Features (e.g., OGS)
A   B   C

Discontinuous Values (e.g. features)
W   X   Y   Z

2. A DiscontinuousProjection is used to project any type of track

Projected Reference
A   B   C

Projected Features
X   Y   Z

Projected Continuous Features (BigWig, Sequence)
A   B   C
8   16 24   32 40   56

3. Tracks are projected into the new space and can be reverse projected as well
